

# DeskDefender

Defending networks from complex dangers

## What's in it for you?

Every day, networks are facing new online risks that threaten businesses with security breaches, slow performance, damaged productivity and expensive network clean-up exercises.

Designed to work alongside intY MailDefender and intY WebDefender for exceptionally robust security, intY **DeskDefender** defends companies from the new breed of online threats.

Blending market-leading virus, spyware and intrusion prevention plus a management portal in one convenient package, the solution makes managing security and enhancing network defences easier than ever before.

## Service features

### Control features

The intY DeskDefender Management Portal allows companies to configure their computers' security profile, add and remove users and view their security status. The portal also generates comprehensive reports while informing users of the latest emerging security threats.

### Threat scanning

intY DeskDefender features scanning of all email traffic, web scanning of HTTP traffic before data arrives on web browsers, and spyware protection. It also prevents application hijacking by data stealing software. What's more, the integrated desktop firewall and intrusion protection blocks unauthorised access attempts, while repelling illicit system changes, browser hijacking and code injections from unknown threats in real time.

### Automatic service

Thanks to its multiple real-time scanning engines, intY DeskDefender stops viruses ever reaching your networks. Resilient servers also automatically update the service's virus definition databases every day, protecting networks from the latest online dangers. intY DeskDefender's updates are the fastest and most frequently updated in the security industry.

### Mobile security

intY DeskDefender's preset security profile is designed to provide maximum protection for laptops used outside the office. Profiles can be adjusted to match users' individual requirements when working in a secure environment.

## DeskDefender Portal

# DeskDefender

Defending networks from complex dangers

## Benefits of DeskDefender

### + Real-time protection

The service continuously blocks threats targeting your networks through email, the internet, hard disks, including USB sticks, and CD-ROMs

### + Automatic updates

intY DeskDefender updates its virus definitions daily to protect businesses from the latest complex risks

### + Easy installation

intY DeskDefender immediately replaces existing anti-virus software, protecting businesses with pre-defined configurations

### + Comprehensive defence

From workstations to mobile laptops, intY DeskDefender protects all your computers when connected to the internet

### + Grows with the business

intY DeskDefender is a flexible subscription service that adapts easily to the company's changing size and needs. The service's online portal also makes managing licenses effortlessly straightforward

### + Technical support

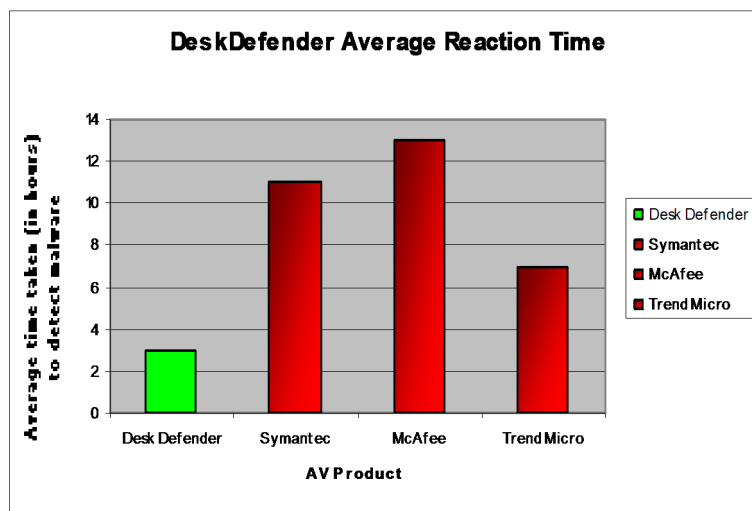

intY DeskDefender's software updates automatically, and your users always enjoy access to our renowned technical support teams

### + Effortless management

The intY DeskDefender Management Portal gives you complete control over your computers' security settings, wherever your users are situated. You can check any of your individual users security status to verify that their anti-virus and firewalls are enabled, and which version they are running on. In-depth reports on the security of your network can also be produced. Users can be removed and added as necessary.

In independent tests performed by AV-Test\*, was quicker at proactive detection of malware compared to McAfee and Symantec in anti-virus testing. Therefore making DeskDefender one of the fastest in the industry to detect malicious software.

Note: Includes proactive detections (0 hour)
