

Hosted Exchange 2007

Email on demand

Microsoft®
GOLD CERTIFIED
Partner

With a high number of tasks now performed outside of the office, staff need a way to access their emails and files from any location, and be able to share them with colleagues, customers and business partners.

The solution? **Hosted Exchange** from intY allows your employees to securely share their contacts, folders, tasks and email on the move.

This ensures complete business-class email, accessible from any location.

Hosted Exchange is Microsoft's best in class messaging and collaboration platform delivered as a Software-as-a-Service (SaaS) solution. It provides business-class email and is managed by our expert engineers in a secure, hosted Infrastructure.

Exchange can do more than send and receive email – it enables employees to share calendars, folders and contacts using Microsoft Exchange as the mail server and Microsoft Outlook as your client.

Hosted Exchange fully integrates with intY's Management portal and Active Directory technologies to deliver a one touch implementation and management experience with low cost of ownership.

Share information

Work effectively to collaborate on documents with co-workers, customers and business partners.

Public Folders allow you to share your work with colleagues and keep everyone up to date on the latest versions of your files, ensuring everyone is working from the same documents.

Shared calendars let your employees see when their colleagues are in meetings or on holiday, meaning they can effectively prepare for future tasks.

Shared task management enables everyone involved in a project to create, collaborate and manage tasks, so they are working towards the same goals and deadlines.

Information on the go

Employees are increasingly mobile, working from the office, home, meetings and on the road. Up to 70% of business data resides in email, therefore having anywhere access to all your emails, tasks, contacts and folders is a necessity in order to keep your business running efficiently .

With Hosted Exchange from intY, your employees will have access to all their most valuable information through a browser (Outlook Web Access) connected to the internet, or any mobile device such as a Smartphone or pocket PC.

Peace of Mind

Hosted Exchange provides reliability and outstanding performance. Daily backups and recovery are made of all your emails, shared calendars, contacts and shared folders to ensure that you don't lose any of your valuable business data.

With MailDefender world class email protection, you will no longer have to worry about increasing levels of spam, or whether your virus scanner is up to date. Hosted Exchange from intY will take care of all that for you.

Hosted Exchange 2007

Email on demand

Key Features

- **Business-class messaging**- Allows users to share calendars, task management, contacts, delegate other users to access your inbox if you are away, set up an out of office reply and more.

- **Enhanced Security**- Users have to be authorised to gain connection to the network. Includes automatic anti-virus and anti-spam updates and email back-up, archiving and recovery

- **Public Folders**- A common location to store documents for others to view and contribute to, removing the need to email them

- **Shared Calendars**- Keep up to date with your colleagues schedules

- **Shared task management**- Create and collaborate on projects

- **Customised forms**- Design and store standard documents such as time sheets, that can be accessed from one place by everyone

- **Shared Contacts**- Your companies global contact list will be available for everyone to view, meaning easier access to information such as customer contact details

- Enables mailbox connectivity through any computer with **OWA (Outlook Web Access)**, and Mobile devices with **OMA (Outlook Mobile Access)**

- Provides support for **Unified Messaging (UM)** so users can access their voicemail, faxes and email from their inbox

- **Exchange Management Shell**- Allows administrators to control users mailboxes

Benefits

- We provide you with the benefits of the very latest 2007 Exchange Server
- Simple to receive email, share contacts, tasks, folders and collaborate on projects from wherever you are
- Outsource your email system: no need to purchase hardware, or change your IT infrastructure
- Technical support from our exchange trained support team
- Can access all of your shared files, email contacts etc, even when working offline
- Access from any computer, laptop or mobile device that is connected to the internet
- No need for complicated VPN or intranet solutions
- Full disaster recovery as daily back-ups stored off site
- Lowers running costs as you only pay a per monthly cost based on user numbers
- A flexible solution that easily grows with your business to add more users and features as you require them
- Provides all the benefits of a large enterprise email solution for small to medium businesses

BlackBerry & Hosted Exchange

BlackBerry can now be synchronised with your Microsoft Hosted Exchange 2007. It gives you all of the features of Hosted Exchange but on your BlackBerry, such as Shared Calendars, Tasks, Contacts and Outlook. This enables your employees to work in real-time from wherever they are. As Microsoft Exchange is hosted by intY there is nothing for you to install or maintain. All you have to do is sync your BlackBerry to your Hosted Exchange service!

Benefits:

- Increase the efficiency and productivity of your staff
- Comprehensive anti-virus and anti-spam
- Wireless synchronisation
- Simple to set up and provision
- Remote device wipe
- Daily backups of mailbox data

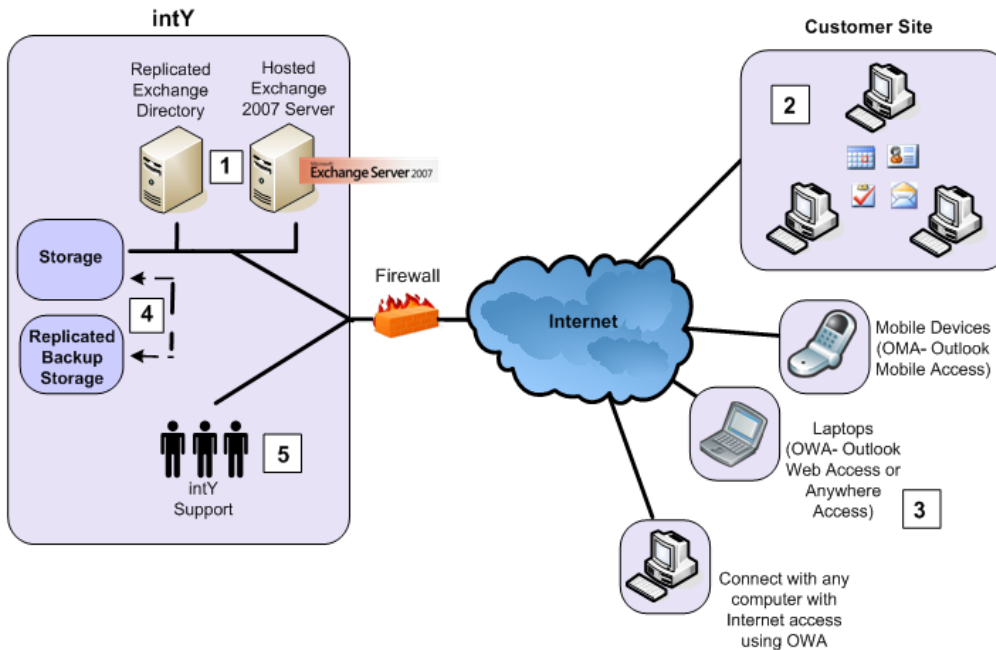

Hosted Exchange 2007

Email on demand

How Hosted Exchange 2007 works:

Unified Messaging (UM) and Microsoft Office Communications Services (OCS)

intY Hosted Exchange integrates fully with the following:

UM– Saves costs over traditional voice mail systems by consolidating email and voice mail into one inbox, giving users unique and powerful new ways of accessing their voice mail with a telephone, computer or mobile device.

OCS– Enables users to contact people based on their availability, giving up to date information based on their status on the network, calendar or personal preference. It uses IM to initiate real time communication, desktop sharing and video conferencing.

Outlook Mobile Access

- Synchronize your exchange data from your PC with your mobile device
- Enables your mobile users to browse their contacts, calendars, email and task lists from their mobile, PDA or Microsoft mobile
- Pushes all email, voicemail, faxes etc to your mobile device as soon as they arrive at the server
- Your employees will never be out of touch as they can access their information from anywhere
- Administrators can remotely manage and enforce corporate IT policies
- Compatible with iPhone and most business mobiles

How Hosted Exchange 2007 works:

- 1. Exchange 2007 Server**– All users mailboxes are switched from your existing server to intY's Hosted Exchange 2007 Server
- 2. Customer Site**– All users at your site will have full access to shared calendars, task lists, contacts and email through Outlook
- 3. Remote users**– All of your remote users will have access to shared calendars, email and contacts through any web browser using Windows OWA (Outlook Web Access), OMA (Outlook Mobile Access) or Outlook Anywhere Access
- 4. Storage**– All data is stored and regularly backed up in an offsite location by intY
- 5. Support**– Users have full access to the Microsoft trained intY support team

Hosted Exchange 2007

Email on demand

Hosted Exchange makes it possible to effectively stay connected with all of your workers, and helps them communicate more efficiently.

It is a flexible solution that will revolutionise the way you conduct business, and will resolve many of your business communication issues:

Problem	Feature of Hosted Exchange	Benefit
Exchange will be too complicated to integrate into our current system	Your email system will be outsourced to us, so you will not need to purchase hardware or change your IT infrastructure.	Allows small businesses the ability to have the same professional email that traditionally only large businesses could have.
Our business size and needs are continuously changing	You can add or remove users and features as you need them.	Exchange provides a flexible solution that grows with your business, and you can adapt the features to change with your business needs.
Increasingly mobile workforce who need access to their email, task lists etc from anywhere at anytime	All email, task lists, contacts and calendars can be accessed from any computer or mobile device that has outlook and is connected to the internet.	Your employees will never miss a business opportunity as they will always be able to access their most crucial information.
Most of our business is conducted through email and we cannot afford to lose any important information	Daily backups are made of all your email, tasks, calendars and contacts. Automatic anti-virus and anti-spam updates.	Peace of mind that your information is safe and backed up so that you will not lose any of your most vital data.
Our staff do not have the ability to share information such as contacts, calendars etc	All of this information can be shared through Outlook.	Your staff can be more productive, efficient and collaborate in their day to day work.
Our IT staff do not have the knowledge or the time to deal with any problems that may arise from using Exchange	Our support staff are fully trained and Microsoft certified.	We will provide you with full technical support leaving your IT department free to deal with other issues.
It will be too expensive to implement	You pay monthly on a per user basis.	You only pay for the services and amount of users you need.

With this many benefits, and none of the administrative hassle, Hosted Exchange from intY is the perfect solution for all of your business communication needs.
