

Hosted Exchange 2007

Secure by Design

Microsoft®
GOLD CERTIFIED
Partner

Managed Email security with 99.9% Guaranteed Uptime

With intY Hosted Exchange you reap the productivity benefits of a world class business messaging solution, without incurring the costs and overheads of owning and managing your own platform.

As you have no on-site servers to install or software licensing and maintenance fees to manage, your IT staff can focus on core business activities.

Reliability – guaranteed

At intY we've been running secure hosted managed services for thousands of customers for many years. When we designed our Hosted Exchange infrastructure we combined that experience with industry best practice to ensure the ultimate in performance and reliability.

Here are just some of the reasons why leading UK companies choose intY Hosted Exchange for email:

- 99.9% SLA
- Telco standard data centre with full UPS and generator facilities
- Multiple diverse Internet connectivity
- Entire system built to Microsoft reference specifications for guaranteed Performance and Support
- UK's first Hosted Exchange 2007 Implementation
- MailDefender advanced spam and virus filtering
- Fully redundant Cisco routing and load balancing
- Fully redundant Mail server and database backend
- SAN storage architecture with full RAID resiliency and data path diversity
- Hourly image snapshots
- Daily offsite image backup
- Individual mailbox recovery facility
- Access to Microsoft Certified engineers 24 x 7
- Application and patch upgrades
